EXPERIENCE

Web Developer - Grey-Box (Canada)

January 2024 - August 2024

- Developed "Web Scraper" Chrome extension.
- Managed and optimized the Grey-box site in WordPress.
- Enhanced UI of extension with CSS and JavaScript.

Web Developer - AJ Infosoft (Remote, India)

February 2023 - September 2023

- Developed responsive UI using Bootstrap and Tailwind CSS and built server-side logic with Node.js.
- Managed database with MySQL and implemented secure APIs; utilized AWS for scalable deployments.
- Developed full project lifecycle, collaborating with teams to solve technical issues and ensure timely delivery.

Web developer | Internship, Techeshta. (India)

May 2022 – September 2022

- Developed responsive landing pages and web apps (HTML, CSS, JavaScript, Bootstrap), achieving a 25% increase in user adoption.
- Enhanced functionality through server-side logic (Python, Java), REST APIs, MySQL database management, and CRUD operations.
- Fostered Agile collaboration, ensuring project delivery and functionality improvements.

SKILLS

- **Database Management:** MySQL/ MongoDB/ AWS
- **Lib & Frameworks:** Next.js/ React.js / Bootstrap/ Node.js
- RESTful APIs/ Shadcn UI/ Tailwind CSS
- Critical thinking/ Interpersonal skills/ Client focused.
- **Languages:** Python/ Java/ JavaScript / PHP.
- **Operating Systems:** MS Windows/ Mac OS
- WordPress/ Git/ GitHub/ MS Word/ MS Excel.
- Communication/ Teamwork/ Adaptability/ Problem-Solving

Education

BSc. in Information Technology (4 Year), Concordia University of Edmonton.

January 2021 – December 2024

- Major: Information Technology | Minor: Mathematics
- Courses: Software development/ Web development/ Economics/ Database management/ Networking/ Business/ Cybersecurity.
- **PROJECTS:** AI-Finance-Advisor (react.js, Chat GPT API), Travel-agency-website (PHP, MySQL)/ Secure-chat-app (Python)

High School, Ashadeep Academy

January 2017- January 2019

- Computer Science (Grade A)
- **Subjects:** Programming Fundamentals, Object-Oriented Design, Web Development Basics, Problem-Solving.
- **Activities:** Developed dynamic websites and simple software applications.

PROJECTS

AI-Finance-Advisor

- ChatGPT API, React.js, Tailwind CSS
- Simplify personal finance with tailored advice.
- Real-time insights, spending analysis, secure data handling.
- User-friendly web app for smarter financial decisions.

Restaurant Website

- A fully responsive Website using HTML, CSS, JavaScript, and Bootstrap.
- Hosted the website at one platform.
- Dedicated to continuous learning and improvement, constantly enhancing the website to deliver an even more delightful and seamless user experience.

ACTIVITIES & CERTIFICATES

- Along with software development I have been involved with competitive programming on online coding platforms like LeetCode. With these experiences I have developed data structures and algorithms skills to solve complex problems.
- Prompt engineering course by DeepLearning.ai
- Project with ChatGPT API by LinkedIn
